

FILL THE GAPP S.L. considers Information Security a strategic decision that allows us to achieve our internal and business improvement objectives.

In the daily management of all our services, it is essential to guarantee the confidentiality, integrity and availability of data, information and communications that achieve maximum information security.

This is why the Management of our organization has promoted the implementation of an information management system in accordance with the requirements of the UNE-EN-ISO 27001 standard and is committed to leading, and promoting security at all levels of information in accordance with this policy, complying with all legal or regulatory requirements applicable to information security, and working for a continuous improvement of the management system, which allows us to identify and treat all security risks of the information detected.

We establish as main guidelines:

- Protect the organization's information assets against all internal and external threats and vulnerabilities, whether they occur deliberately or accidentally.
- Maintain the confidentiality of the information we use in the provision of our services.
- Maintain the integrity of the information in relation to the classification of the information.
- Comply with the requirements of the laws and regulations in force.
- Update security training for all our staff.
